TMX# 3-220-0068 9" OPENING
TMX# 3-220-X69 9.13" OPENING
TMX# 3-220-0081 10" OPENING

Precision Vises -SINGLE STATION-

- Clamping Force:
 - 6" VISE 8,200 lbs.
 - 8" VISE 11,600 lbs.
- Anti-lift mechanism prevents jaw from lifting
- Close tolerance along the bed height for excellent precision
- Excellent performance in various machining applications such as:
 - Heavy Roughing
 - Drilling
 - Tapping
 - Facing
 - Grinding
- Increased vise life due to its sealed bearing system
- Protective shield protects lead screw from chips
- TMX vises are ultra-precise in straightness, parallelism, and squareness
- Hardened Ductile Iron body to 45RC

Dimensional view 3-220

TMX# 3-220-X69

- Provides two sets Thru-Body Mounting Hole Options
- Jaw opening 9.13"
- Weight 68 lbs
- Compare to Kurt® Model DX6

PRODUCT**

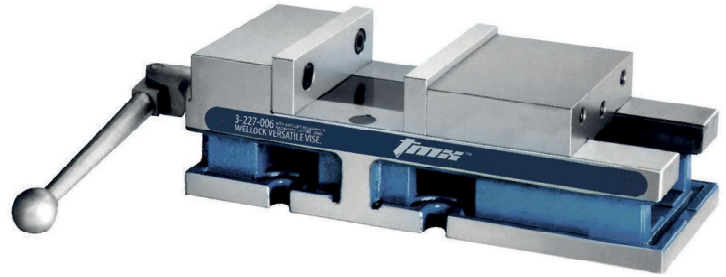

TMX# 3-224-004

TMX# 3-224-006

Doble Station Vise

- Jaw Opening:
 - 4" per station (9" without center jaw)
 - 6" per station (12" without center jaw)
- Simultaneous operation of two movable jaws and clamping of two workpieces (2 same size workpieces or 2 different size workpieces)
- Force distribution ensures that the same force is applied to both workpieces, preventing deflection and lifting
- Simplified design for chip evacuation
- U.S. Patent

TMX# 3-227-006

Versatile Milling Machine Vise

- L-shaped base provides greater rigidity and stability for heavy-duty roughing and close-tolerance applications.
- Ground faces allow for:
 - Front and vertical mounting on vertical machining centers
 - Horizontal mounting for horizontal machining centers (in second position)
 - Side-by-side mounting for simultaneous operation of multiple presses
- Simplified design for chip evacuation

Why Choose TMX?

- Compatible with leading brands in the market
- Superior clamping force
- Our vises are engineered to the highest standards and meet tight tolerances, guaranteeing quality and reliability
- Engineering support and customer service
- Large inventory in Mexico and the USA
- 3D models and CAD drawings available for download
